

3 12

July 15, 1960, 12:00 P.M. - 13 N.Y.
A small, dark, bird-like insect was found
in a box containing dried leaves. It was
about 1/2" long, with a slender body and
thin legs. The wings were folded back
against the body. The head was small
and pointed. The body was covered with
fine hairs. The wings were transparent
with some darker markings near the base.
